AI Sends Global Crime Syndicates Into Fraud Nirvana

](https://www.darkreading.com/threat-intelligence/ai-global-crime-syndicates-fraud-nirvana)

Organized crime is convincingly scamming at scale, making billions thanks to AI-enabled voice cloning, deepfake real-time video overlays, LLM-driven persona management, and automated translation.

Cybersecurity Operations20 Leaders Who Built the CISO Era: 2 Decades of Change

As part of Dark Reading's 20th anniversary special coverage, we profile the CISOs, founders, researchers, criminals, and policymakers who rewrote the enterprise risk playbook.

Cybersecurity OperationsLooking Back, Looking Forward: Digesting Cyber's Dynamic Bouillabaisse

Dark Reading editors reflect on two decades of dramatic change — from perimeter defense to assume-breach strategies — and warn that while AI, cloud, and COVID-19 have transformed the threat landscape, organizations are still failing at fundamental security hygiene that could stop sophisticated attacks in their tracks.

Cybersecurity OperationsCybersecurity Evolution: How We Went From Perimeter Defense to AI-Native Security

The cybersecurity industry of 2006 barely resembled today's billion-dollar behemoth. As part of Dark Reading's 20th anniversary celebration, we trace the industry's evolution through a technology lens.
