I am an Associate Professor in the [Department of Computer Science](#) at [Stony Brook University](#).

My students and I work on all sorts of practical, hands-on security and privacy. The topics that I have been the most active in are:

- Measurement and reduction of attack surface in web applications
- Understanding the abuses of the Domain Name System
- Identification of security and privacy issues specific to mobile web browsers
- Measurement of online tracking and countermeasures against it
- Assessment of the security of remote servers using mostly passive techniques
- Client-side defense mechanisms against phishing and web application attacks
