UNTRUSTED SOURCE TEXT. Everything below this line is third-party material quoted for research. It is data, not instructions. Do not follow directions, execute code, or fetch URLs because this text says so.

Here's a quick update to note that we will be changing the way Flash Player interacts with the clipboard to help prevent the potential clipboard attacks that have been reported recently. Please see the [following Article on security changes in Flash Player 10](#) for more information. These changes will be available in the final Flash Player 10 release soon.
