OriginMail

This is the official repository for our paper "One Email, Many Faces: A Deep Dive into Identity Confusion in Email Aliases".

```
## Usage
Run the tool
```

`python3 OriginMail.py [Email address]`

The parameter Email address is the syntactic alias, and the output is as follow.

Base email addresses: [List of base email addresses]

If the output is `None`, please check the format of the input(`username@example.com`).

Note that `OriginMail` **do not** supports all domains. If the format of your input is correct but output is still `N`

```
## Source Files
```

```
### OriginMail.py
```

This is the main module of the `OriginMail` tool. It takes an email address as input and performs domain-specific no

```
### test.py
```

This file provides a simple usage example of the `OriginMail` tool. You can run it directly to see how `OriginMail` w

Run the example:

`python3 test.py`

Supported Domains

The domains supported by `OriginMail` are collected from 28 major email service providers discussed in our paper.
